STAMP hierarchical control structure
TIER 1 Fleet Safety Management
Route and dispatch policy, speed policy, ODD limits
Accountable for the operational design domain
Receives interlock audit logs and exceedance trends
speed policy, ODD limits
audit log, exceedances
TIER 2 Vehicle Visibility Supervisor
Software controller enforcing SC-1 to SC-5
Process model: sight distance, particulate load,
road class, commanded speed, override state
AI severity prediction is an input, never an authority
target speed, hazard command
visibility and PM readings
TIER 3 Actuators and driver
Engine torque limit, service brake, hazard lamps
Driver override switch has priority (SC-3)
Reports wheel speed and achieved deceleration
